DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-12, drawn to a selective binding partner for 5-HT5 receptors.

Group II, claim(s) 13, drawn to a process for the determination of the affinity of binding partners for 5-HT5 receptors.

Group III, claim(s) 14-17, drawn to a process for the determination of the activity of binding partners for 5-HT5 receptors.

Group IV, claim(s) 18, drawn to an in vitro screening process for the identification of a 5-HT5 receptor binding partner.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I invention is directed to a binding partner for 5-HT5 receptors and a method of using thereof (claims 10-12). Pursuant to 37 C.F.R., the main invention in the instant application comprises the first-recited product, and a binding partner for 5-HT5 receptors, and the first-recited method of using that product, namely the use of the binding partner for producing an agent for the treatment of cerebrovascular disorders. The additional methods of Groups II-IV inventions do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same technical feature as they require different compounds, distinct methods steps, and are for different purposes.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
